Retail Sales Analysis | 2014-2017 | United States

Prepared by: Ibeh Doris Chinelo

Tools: Power BI, Superstore Dataset

July,2026

Objective

- **Project Objective**

- The goal of this analysis is to turn raw Superstore sales data into actionable insights for leadership.

- **Key Objectives:**

- Track Performance: Monitor Revenue, Profit, Orders, and Margin in real-time
- Identify Drivers: Find out which Region, Category, and State generate the most profit
- Spot Problems: Detect underperforming areas in South Region and low-margin products like Furniture
- Show Trends: Analyse 4-year sales growth from 2014 to 2017 to support forecasting
- Enable Decisions: Provide interactive filters so management can drill down and make faster decisions

Data Overview

- **About the Data**

- Dataset: Superstore Sample Data

- Time Period: 2014 to 2017

- Records: 5,099 Orders

- Geography: United States - 4 Regions, 49 States

- Categories: 3 - Technology, Furniture, Office Supplies

- Key Fields: Order Date, Region, State, Category, Sales, Profit, Quantity

Business Problem

The Challenge

Leadership needed a clear way to track sales and profit performance across regions and categories.

Key Business Questions:

1. Which region generate the most revenue?
 2. Which categories are driving growth?
 3. What trend can decision-maker learn from?
 4. Which states generate the most profit?
- 

KPIs Defined

➤ Key Performance Indicators

Total Revenue
\$2.30M

Total Profit
\$286.40k

Total Orders
5,099

Profit Margin %
0.12

Category

- ☐ Furniture
- ☐ Office Supplies
- ☐ Technology

Region

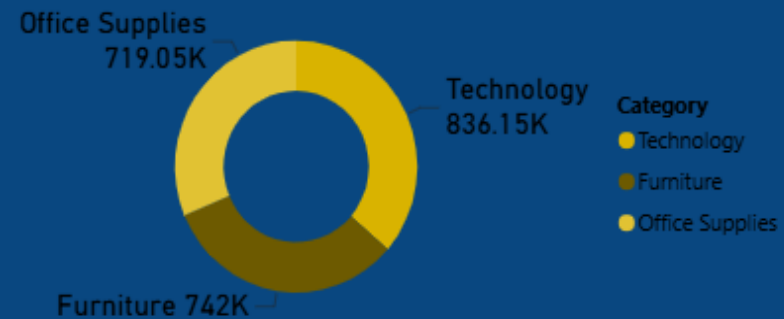

- ☐ Central
- ☐ East
- ☐ South
- ☐ West

Order Date

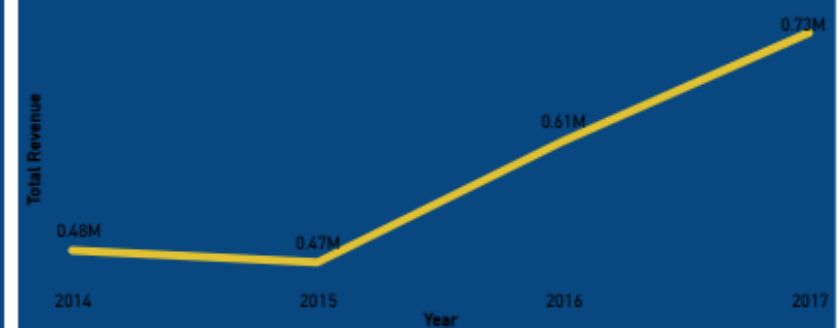

1/3/2014

12/30/2017

Sales by Category

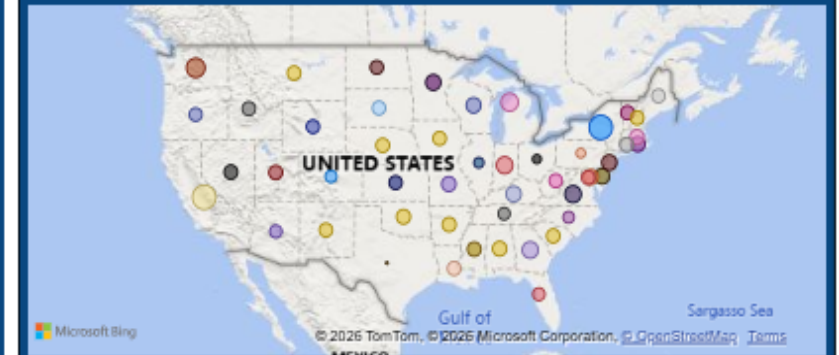

Yearly Sales Trend

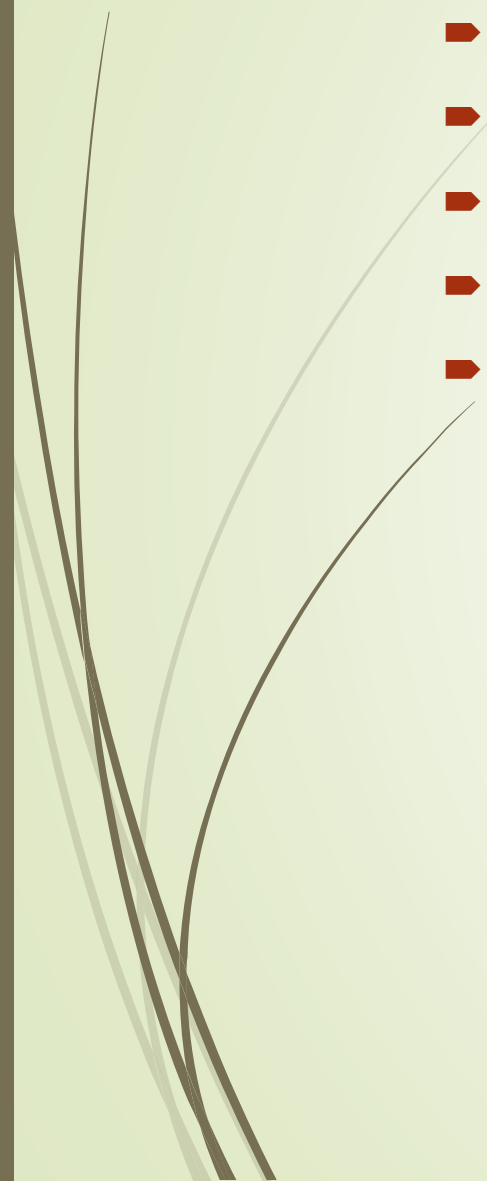

Sales by Region

Profit by State

- **Dashboard Features:**

- 4 KPI Cards for quick overview.
 - 3 Slicers: Category, Region, Order Date for interactivity.
 - 4 Visuals: Sales by Category, Yearly Trend, Sales by Region, Profit by State Map.
 - Drill- down was enabled on Region – State.
- 

Key Insights

- **What the Data (Visuals) Tells Us**
- **Category Insight:** Technology is the top revenue driver at \$836K, followed by Furniture \$742K and Office Supplies \$719K. While Furniture generates revenue, it has the thinnest margins due to discounts and logistics costs. Technology and Office Supplies are more profitable.
- **Regional Insight:** The West leads all regions with \$724K in sales and is the most profitable. The East follows at \$678K, then Central at \$501K. The South is the weakest at \$466K and needs strategic focus.
- **Sales Trend Insight:** The Yearly Sales Trend shows strong YoY growth from 2014 to 2017. The steepest growth happened between 2015-2017, indicating successful scaling and effective business strategies.
- **Profit by State Insight:** : Profit is concentrated in a few key states. Top Profit States include California, New York, Texas, Washington, Illinois. The Profit by State map shows small profit bubbles in many Midwest and Southern states. That is Coasts are driving profit. Middle states are underperforming
- **Overall Performance:** Sales from 2014-2017 generated \$2.30M revenue with 12% profit margin, but performance remain uneven.

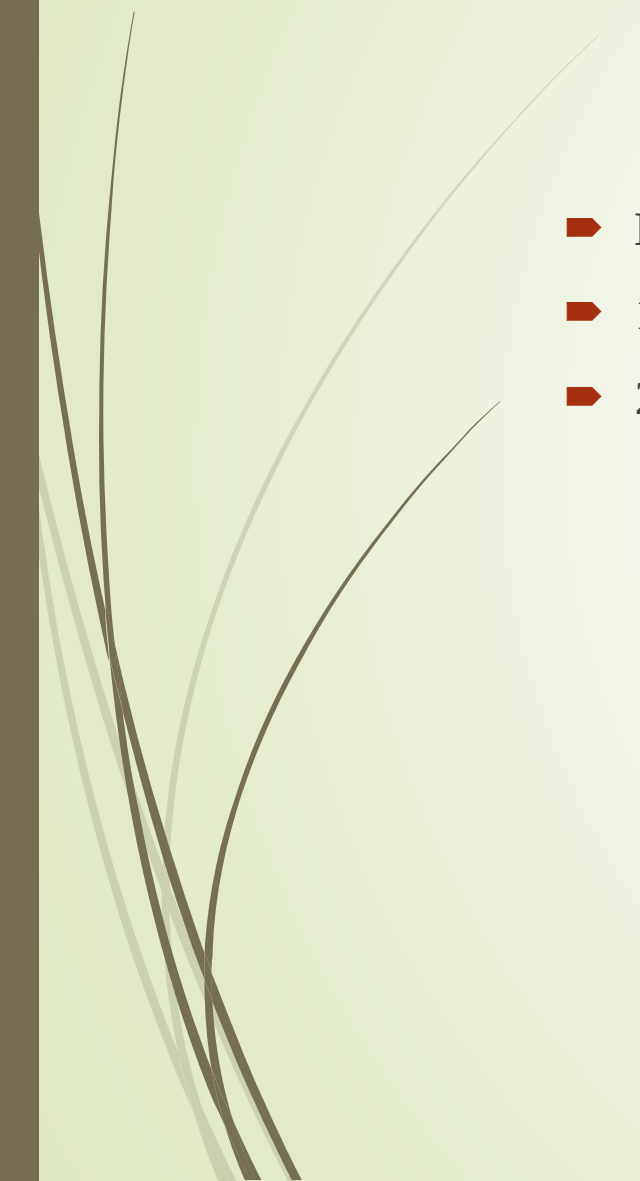

Recommendations

- **Actions for Decision Makers**

- Decision Makers should invest in focus sales, marketing and inventory in West Region and top states: CA, NY, TX, WA.
 - Also, Improve Audit Furniture pricing and discounts to improve margins.
 - Decision Makers should Investigate low performance in South Region and low-profit states.
 - And should Replicate the strategies that drove growth in 2016-2017.
- 

Challenges Encountered

- **During Project Development**
 - 1) Drill-down Setup was made by adding state under Region to enable drill capability.
 - 2) Choosing the right chart type to clearly show profit by state.
- 

Conclusion

- Superstore is on a growth path. By focusing on high-performing regions and categories, and by fixing underperforming states, we can increase total profit beyond the current \$286.40k.
